

# We are a leader in the connected car industry

AT&T is committed to the future of connected car technology. Whether it's through our work with top automakers, at our connected car research and innovation center, or testing and validating technologies in cities and proving grounds – AT&T is leading the way in the innovation of the connected car.

We connected more than 50 percent of all new connected cars in the US in 2017

## 1M+
