

# AT&T Offers Streamlined IoT Solutions in the UK

AT&T now has an agreement with Three Group to resell Three UK wireless services. The agreement will allow AT&T to offer its global business customers in the U.K. localized contracting and billing for wireless voice, data, and SMS services.

AT&T customers based in the U.K. or with operations in the region will benefit from:

- Flexibility to execute local contracts in the U.K.
- Local billing and seamless bundled connectivity solutions end-to-end.

*"We're seeing a growing demand for IoT solutions from global businesses in Europe. AT&T is now able to deliver IoT with a simplified process in the U.K.," said John V Slámecka, Region President EMEA, AT&T. "It's part of our strategy to remove complexity and offer seamless IoT solutions to our customers around the world."*

## Key facts about Three UK's 3G and 4G LTE network:

- Covers 99.5% of the U.K. population and more than 90% of the U.K.'s landmass.
- Carries over 32% of the U.K.'s mobile data traffic.
- Has more than 3x the industry average of data per subscriber, making it ideal for high-bandwidth IoT applications like connected cars.
- Consistently rated the best network for data by U.K. mobile users.<sup>1</sup>
